

ABSTRACT OF THE DISCLOSURE

5 A semiconductor chip has a circuit block,  
a power supply line and a ground line. A condenser  
chip in which a noise reduction condenser connected  
to the circuit block is stacked on the semiconductor  
chip. Because the condenser chip is stacked on the  
semiconductor chip, it is not necessary to provide a  
noise reduction condenser on the semiconductor chip  
and also not to provide a noise reduction condenser  
10 on a substrate on which the semiconductor chip is  
mounted.
